

VSA Analytics is a robust, interactive, and user-friendly tool to support college and university leaders' use of data in strategic planning and decision making.

CREATE DETAILED REPORTS IN MINUTES

VSA Analytics allows users to build custom visualizations and graphical reports with a custom visual analytics platform in just minutes. It eliminates the need for an institution to spend days searching, downloading, integrating, and analyzing data. Subscribers can add as many campus users as they would like and download the entire custom dataset.

BENCHMARK YOUR INSTITUTION

Designed to bring flexibility to campus users, VSA Analytics offers more than 25 benchmarking reports based on a custom national dataset containing almost 400 variables from roughly 4,400 institutions. Data include: enrollment, cost of attendance, graduation rate, the new IPEDS Outcome Measure, R&D expenditures, financial aid, admissions, student-faculty ratio, Student Achievement Measure, degrees by program, and more.

ACCESS COMPREHENSIVE NATIONAL DATA

Trend reports with 9 years of integrated national data are now available.

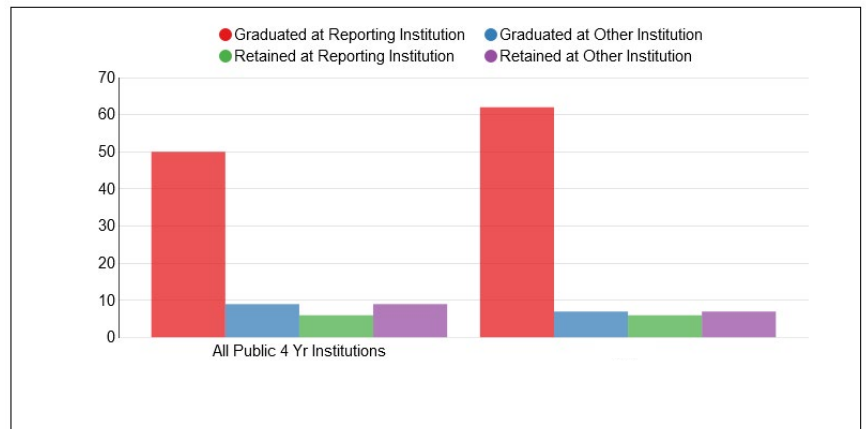

Subscribers are now able to create and save peer groups.

SUBSCRIBE NOW

A yearly subscription cost of \$1,000 for APLU and AASCU members and \$2,000 for non-member institutions allows for unlimited users from a single institution and gives access to the entire dataset and data visualization tools.

Student Achievement Measures (SAM)

Limits: Student Type First-time Full-time 2012-13
